

Edit Translator [0] : New Translator

▼ Translator Options

Here you can define general options of this Translator Entry. For example the name, if it is currently enabled, and how to proceed after this Translator Entry successfully executed.

Name:

 Active Stop processing after executing this translator

▼ Incoming

Type:

MIDI message: CC ch.1: #20, 101

 Capture MIDI

Enter a MIDI message as a sequence of hexadecimal numbers. You can also use variables (pp, qq, ...) E.g. 90 4A pp will trigger on all Note On messages of key 4A with any velocity. The velocity will be available in the variable pp.

 Description (optional): Swallow MIDI message, do not pass on to routed ports

Select MIDI ports:

 Project/Preset Default Ports Specific Ports...
