Edit Translator [0] : New Translator

Translator Options

Here you can define general options of this Translator Entry. For example the name, if it is currently enabled, and how to proceed after this Translator Entry successfully executed.

Name:

Active

Stop processing after executing this translator

Incoming

Type:

MIDI message:

Capture MIDI

B0 10 66
 B0 10 67
 B0 10 68
 B0 10 69
 B0 10 6A
 B0 10 6B
B0 10 6C

Enter a MIDI message as a sequence of hexadecimal numbers. You can also use variables (pp, qq, ...) E.g. 90 4A pp will trigger on all Note On messages of key 4A with any velocity. The velocity will be available in the variable pp.

Description (optional):

Swallow MIDI message, do not pass on to routed ports

Select MIDI ports:
